1. The stakeholders involved in the YorkUEats food menu app would consist of primary users such as students, faculty, and staff, with secondary users such as vendors, administrator, and visitors. The list below is not an exhaustive list of all potential users within the overview category to form a general overview for understanding.

### Primary:

- **Students:** Undergraduate students, graduate students, international students, part-time students.
- **Faculty:** Professors, researchers, teaching assistants
- **Staff:** Administrative staff (office assistant, etc), maintenance staff, campus security.

### Secondary:

- **Vendors:** Various food vendors,
  - **Administration:** University executives, registrar office, finance and budgeting departments, academic departments.
  - **Visitors:** Parents, family members, friends, prospective students, guest speakers.
2. The YorkUEats app caters to the busy campus lifestyle, providing easy dining solutions for students, faculty, and staff constantly on the go. Using their mobile devices, users can quickly and simply choose a restaurant, customize orders, schedule pickup through the user-friendly interface. Users also receive real-time notification and accurate order readiness estimates based on historical data, time of day and queue lengths allowing users to skip lines and grab their meals at their preferred times.
  3. The user will be able to enter search criteria in the search bar and press enter to see a list of matching menu items. They can scroll through the list, tap on a item for more details, and easily go back to the research results or search interface with the back arrow navigation. The user can also press on the Add button to add to cart for checkout, there are also other functionalities that are not important with regards to the scope of the question asked above.
